

Hillside Lifts

Hill Hiker® lift systems help residential and commercial customers all over the world traverse the most hard-to-reach locations. If you own real estate on a steep hillside, waterfront property or require easier access to your home or place of business, the Hill Hiker® hillside elevator is right for you. You will enjoy the CONVENIENCE, SAFETY, VALUE and RELIABILITY of the best designed incline elevator on the market today.

A Family Company Serving the World

Hill Hiker, Inc. is a family owned manufacturing and contracting company specializing solely in outdoor hillside elevator systems also known as trams, lifts or funiculars.

Founding and Vision

Hill Hiker, Inc. was founded in 1997 by Bill and Laurel MacLachlan with the vision to create a better outdoor lift system that would lead the industry in design, safety and value.

They drew on 15 years of elevator industry experience, and the engineering expertise of Laurel's father, Noel Davis (MIT Graduate and Inventor), to develop an innovative and award-winning design known worldwide for its superior functionality and attractive appearance.

Located on the Bay of Fundy in Canada, the Five Islands area is known for the highest tide on

earth, fluctuating anywhere from 40 to 60 feet everyday. Due to the large tide changes, the Hill Hiker® lift system had to be built with high grade stainless steel to withstand being fully submerged in salt water. People who stay on the

Island are driven over in a boat at high tide and get on to the elevator from the boat. This taxi boat was fitted with a remote control that communicates with the Hill Hiker® tram wireless system.

Another unique feature of this project is that the entire Hill Hiker® elevator system is powered 100% by solar energy. The Solar power is gathered and stored in several banks of deep cycle marine batteries at the top of the hill. Due to the remoteness of the project this was a great power solution.

- 100% Solar Powered
- 3 ft Wide Large Residential Rail
- 4x4 ft Large Residential Car
- 5 hp Electric Motor
- Custom Powder Coat Paint Car Finish
- Custom Powder Coat Paint Rail Finish
- International Project
- Metal Post & Concrete Footing Installation
- Stainless Steel Construction
- Winding Drum Drive System

A Great Investment

Forget the hours spent trudging up and down the stairs from the dock, patio, garage, etc. to the house. Hill Hiker® residential lift systems provides a convenient way to get your family, friends and supplies safely up and down steep inclines. Installing a Hill Hiker® lift adds value to your property too. Gain access from high elevations to lakeshore, ocean or riverfront

- Traverse steep inclines between home to garage, garden, pool, golf course, etc.
- Enhance mobility for the elderly or disabled, and small children
